ASPIRE
Shipping Solutions

**MAKES SHIPPING WAY CHEAPER
FOR YOUR ENTERPRISE BUSINESS**

Aspire Shipping Solutions is specifically designed to solve for complexities other platforms can't handle (or can't handle well). Control your entire shipping operation — including core routing + business logic rules — at the user level through a single, simple interface.

Customer-Centric **Value Creation:**

- Ongoing operational support just as important as our codebase
- Unrivaled parcel management and execution
- Network optimization, carrier management, invoice audit and more
- Management with significant industry experience
- Full suite of managed freight and logistics services

Plus, if you need an API or EDI connection outside our existing integrations, we'll custom build it for you.

ASPIRE
Shipping Solutions

**WE MAKE ALL KINDS OF
SHIPPING EASY**

We are a full suite of industry-leading capabilities with full-time operational support, Ongoing operational support + shipment/carrier management from our local on-call expert staff is as important as our software. We'll guide you from parcel to LTL.

Our core differentiating features:

- Live rates via API – no manual rating engine updates (eliminates on-prem development work).
- Dynamic business rules engine – toggle switch controlled at the local user level (no developer needed).
- Built in batch rating – import shipment files or rate/ship directly through OMS, whatever works best (operational).
- Built-in integrations – turnkey carrier and system API library.
- Centralized station settings – shipping stations configured with the click of a button; transferable and repeatable.

Aspire Shipping Solutions Services can be utilized on our cloud URL, or we can customize into a shipper's WMS, ERP or TMSFlexible, yes, but also designed for the full shipment operation, not just label printing.
