YOUR ULTIMATE PARTNER TO RECOVER REVENUE AND **MAXIMIZE REIMBURSEMENT**

We aim to analyze and recover revenue for the billing that is being underpaid. Our team of experts help with correcting billing and recovering underpaid billing with the help of our proprietary software that analyzes all aspects of your financial circumstances in seconds.

Partnering with us as your go-to for all contracting issues **will facilitate the following:**

- Gives your staff or the billing company the REAL-TIME TOOLS needed to stay on top of your revenue, and always keep the payers honest.
- Gives your staff the access to our Contract Team for questions/concerns/corrections to denials or appeals.
- Maintain or update your Contracts— Any new language, Carve-outs, Fee schedule updates.
- Contract Modeling Tools to see the current agreement changes.
- Contract Negotiations and Product Modeler (different products to align economically with their individual contracts)

YOUR ULTIMATE PARTNER TO RECOVER REVENUE AND **MAXIMIZE REIMBURSEMENT**

What we do?

- **Forensic analysis:** Our contract specialists load the payment rates and terms of the healthcare providers' existing Payer Agreements in the Contract Module.
- **Contracting:** Our 'plug and play' Contract Modeler proposed reimbursement scenarios, rates, and contract terms using the historical claim utilization data.
- **Ensuring HIPAA Compliance:** We utilize HIPAA compliant, proprietary encrypted platform and work with Billing Department and Claim Clearing House to upload the ANSI X12 837/835 electronic files.
- **Analytics/Reporting:** All data elements captured in the electronic 837/835 files are determined by CMS and housed in a secure client-specific environment within the encrypted server.

We bring a revenue cycle management system to help the healthcare providers with necessary tools, data, and business intelligence support necessary to reduce operational costs.
